

VICTOR CITROËN

Senior AI Technical Product Owner & CSM · GenAI Deployment Strategist · Enterprise Engagement Manager

hello@victorcitroen.com · +41 79 831 0369 · victorcitroen.com · linkedin.com/in/victorcitroen · Zürich, Switzerland

Dutch National (EU) · Swiss Residence Permit B (valid to April 2030) · available across Switzerland

PROFILE

Senior product and delivery operator with 8+ years building, pitching and delivering enterprise-technology and AI engagements across Europe, LATAM and the US. Most recently Product Owner for SAGE Jr., a GDPR-compliant AI support system for a Dutch managed-service provider, owning the delivery roadmap and coordinating an AI-assisted build rather than personally engineering it. Career spans a vehicle-service platform deployed across 200+ Volkswagen Mexico dealerships, a compliance system for International Trucks, COO of a USD 500K-funded game studio, and fintech business development engaging tier-1 banks. Operates at the intersection of AI strategy, GDPR-compliant deployment and enterprise commercial delivery — technical enough to lead engineering teams, commercial enough to win and deliver the mandate. Currently building deep, hands-on capability in Palantir Foundry & AIP (ontology modelling, data pipelines and AIP agents).

MOST RECENT ENGAGEMENT

SAGE Jr. — GDPR-Compliant AI Support System · SF-ICT B.V. (Den Dungen, NL) May – June 2026

Product Owner & Delivery Lead · focused 2-month engagement

- Designed and owned the architecture for an AI support layer that ingests tickets via Atera, redacts personal data locally, and drafts responses through Claude with confidence-based routing (auto / draft-for-review / escalate).
- Architected for the client's Microsoft 365 environment with deployment on their Microsoft Azure tenant; n8n orchestration, Atera ticket ingestion and Claude APIs, designed for EU data residency.
- Authored the master project document, architecture specification, build brief and bilingual EN/NL glossary; defined an 11-phase delivery roadmap and drove the initial build with AI-assisted development (Anthropic Claude Code).
- Privacy-first by design: deterministic local PII redaction, encrypted token mapping and an append-only signed audit log for GDPR Art. 30 / DPIA evidence — zero raw PII sent to any external service.

SELECTED EXPERIENCE

Senior AI Technical Product Owner & CSM · SF-ICT B.V., Den Dungen NL (remote) May – June 2026

- Authored a comprehensive AI-governance engagement proposal for a long-standing enterprise client (a 15-year client of the firm): DPIA framework, four-phase rollout, AI Governance Committee structure and a dedicated training programme.
- Produced per-permission GDPR analysis, isolated test-environment protocols and DPIA evidence packs.

Founder & Principal, AI Integration & Product Delivery · VC Technology Consultant, Zürich Apr 2025 – present

- bavivi AG (Zürich real-estate operator) — pitched and demoed, not contracted: an AI automation ecosystem (WhatsApp AI assistant, automation dashboard and AI engine); designed the full solution architecture across 360dialog, OpenAI, Firebase, n8n and Google Cloud Run.
- Patrimonium (Swiss asset manager) — pitched and demoed, not contracted: a multi-module AI command dashboard; built a working demo and full Figma UI/UX prototypes, presented to C-level financial-services stakeholders.

Co-Founder, IT Business Development & Head of Talent Acquisition · 369 Media, The Hague Feb 2024 – Apr 2025

- Co-founded a technology recruitment agency for the Benelux market; €100K+ first-year revenue across 10+ senior placements via AI-driven sourcing, with full P&L ownership from client discovery through retention.

Senior Technology Recruitment Consultant · FRG Technology Consulting & Amoria Bond, Amsterdam Feb 2023 – Jan 2024

- Led technical recruitment for enterprise IT and data roles across banking, media and manufacturing; built deep technical fluency through discovery conversations with backend, ML and infrastructure engineers.

Chief Operating Officer (LATAM) · Dekreed Interactive / Varkalai, Miami (remote) Jan 2021 – Apr 2023

- Product Owner, then promoted to COO, for a USD 500K-funded PC title; aligned product to investor expectations, secured Dubai-based investment, and led a distributed cross-functional team of 10 across time zones in Agile/Scrum.

Founder & Managing Director · SeaiLab, Caracas Sep 2018 – Dec 2021

- Founded and ran a software-delivery studio; led 30+ product deliveries for commercial, industrial and enterprise clients across MX, VE, CO, AR, USA and UK.
- Service Xpress — service-operations platform deployed across 200+ Volkswagen Mexico dealerships (real-time tracking, SLA timing, an early ML suggestion engine), built with a 12-person team.
- International Trucks — workforce-compliance and training platform with auto-generated tests and certifications.

Fintech Business Development Executive · DataSpartan Technologies, London Aug 2017 – Jul 2018

- AI & data-science consultancy positioned as an agile alternative to Palantir; engaged tier-1 bank directors and CTOs (Credit Suisse, Morgan Stanley) at C-level and recruited PhD-level AI researchers into delivery teams.

SELECTED CLIENTS & ENGAGEMENTS

SF-ICT B.V. (AI-governance engagement proposal) · bavivi AG (pitched & demoed) · Patrimonium (pitched & demoed) · Volkswagen Mexico, 200+ dealerships (via SeaiLab) · International Trucks (via SeaiLab) · Credit Suisse and Morgan Stanley (engaged at C-level via DataSpartan BD) · Dekreed Interactive / Varkalai (Dubai investor funding).

CORE CAPABILITIES

Product & commercial: discovery · roadmapping · backlog & sprint ownership · OKRs · RFP & proposal authorship · pricing & monetisation · P&L ownership · go-to-market · C-suite engagement & stakeholder management

Palantir-aligned delivery strengths: customer-facing problem-solving · translating ambiguous business problems into operational solutions · data & ontology thinking · C-level stakeholder management · end-to-end delivery ownership · rapid iteration under ambiguity · technical fluency alongside engineers and data teams

AI strategy & delivery (architected & coordinated): RAG pipelines · vector DBs (Pinecone, pgvector, ChromaDB) · agentic workflows · prompt engineering · confidence-based routing · evaluation & guardrails · Palantir Foundry & AIP (developing hands-on capability)

AI models & assistants (hands-on): Claude · ChatGPT (GPT) · Gemini · Gemma · Perplexity · Grok · Kimi · local models via Ollama · Microsoft Copilot · Notion AI

AI build & automation (hands-on): n8n (production workflows) · Make.com · Zapier · Cursor · OpenClaw · Chatbase · Descript · REST APIs & webhooks · Microsoft Graph · Atera API · WhatsApp Business API (360dialog)

APIs (hands-on): Anthropic · OpenAI · Google · Meta · Grok

Linux/Ubuntu & self-hosting (hands-on): provisions and operates production services on Ubuntu/Linux VPS — n8n workflows, Docker & Compose, Nginx, PostgreSQL, Node.js, tmux, deployments & monitoring · Vercel · Supabase · GitHub / GitHub Actions · Google Cloud · AWS · Azure

Privacy, governance & secure-by-design (practitioner / coordinated): DPIA frameworks · GDPR Art. 30 audit logging · PII redaction (spaCy NER) · EU data residency · encryption at rest · SSO (Microsoft Entra ID) · secrets management (HashiCorp Vault) · isolated test environments

Design & prototyping (hands-on): Figma UI/UX · rapid demo / proof-of-concept building · operator dashboards (Next.js, coordinated)

Business & collaboration (working knowledge): Microsoft 365 · Slack · Trello · HubSpot · Salesforce · Calendly

Technical fluency: reads and directs across Python, JavaScript/TypeScript and SQL codebases; coordinates engineering and AI-assisted build rather than authoring production code

Delivery methods & domains: Agile / Scrum · Kanban · gated milestone delivery · shadow-mode piloting · bilingual EN/NL documentation — enterprise IT & managed services, fintech & banking, real estate, automotive, interactive/gaming, recruitment

EDUCATION

BBA, International Business & Management Studies: NHL Stenden University of Applied Sciences · 2014–2018
International Baccalaureate Diploma: Eerde International Boarding School · 2012–2013

PROFESSIONAL DEVELOPMENT — 2026 ROADMAP (SCHEDULED / IN PROGRESS)

Q2 2026: AIGP – AI Governance Professional (IAPP) · Azure AI-900 AI Fundamentals (Microsoft) · Generative AI Engineering Professional (IBM / Coursera) · Generative AI with Large Language Models (DeepLearning.AI / Coursera)

Q3 2026: Azure AI-103 – Agentic AI & Foundry (Microsoft) · PSM-I – Professional Scrum Master I (Scrum.org) · AI for Product Managers (Pragmatic Institute)

Q4 2026: AI: Implications for Business Strategy (MIT Sloan Executive Education) · PMP preparation (PMI)

Ongoing self-study: Palantir Foundry & AIP · Linux/Ubuntu server administration · applied LLM & agent engineering

LANGUAGES

Native: Dutch, Spanish, English (Cambridge certified) · Professional: Italian (B2) · Conversational: Portuguese (B1) · Basic: German (A2, improving intensively in Zürich)

ORGANIZATIONS & NON-PROFIT

Rotary International · Day Zero Water Netherlands

BEYOND WORK

Personal R&D project: building ATLAS, an autonomous AI trading system — hands-on experimentation with agentic workflows, market-data pipelines and risk logic, as a self-driven learning project.

Open to senior in-house roles in Zürich and across Switzerland · one-month notice · references on request.
